

Basel-III --- Pillar-3 disclosures as on 30.06.2015

Name of the head of the banking group to which the Framework applies.	Jammu and Kashmir Bank Ltd
--	-----------------------------------

Jammu and Kashmir Bank (J&K Bank) is a commercial Bank that was incorporated on October 1, 1938. J&K Bank is the only state-government-owned scheduled commercial bank in India.

Table DF - 2 : Capital adequacy;

1. <u>Qualitative disclosure</u>	
1.1 A summary discussion of the bank's approach to assessing the adequacy of its capital to support current and future activities.	
<p>i) The Bank assesses its Capital Adequacy as per the guidelines of RBI, which are based on the framework of Basel Committee on Banking Supervision. These guidelines on Basel III have been implemented from 1st April 2013 in a phased manner. The minimum capital required to be maintained by the Bank is 9 percent with minimum Common Equity Tier 1 (CET1) of 5.5%. Stress analysis is conducted on half yearly basis or as required to see the movement of capital adequacy ratio (CAR) in medium horizon of 3 years considering the projected growth in business.</p> <p>ii) The Bank assesses its capital requirement based on future business projections in line with the strategic intent of the Bank and opportunities for growth. The business projections are mapped to credit, market and operational risks which allows for assignment of regulatory capital besides providing capital headroom to meet growth projections. As part of the Internal Capital Adequacy Assessment Process (ICAAP), Bank also assesses adequacy of capital under stress conditions for gauging the adequacy of capital to support not only three primary risks of credit, market and operational risk but other residual risks like interest rate risk in banking book, liquidity risk, credit concentration risk, strategic risk and reputational risk.</p>	
2. <u>Quantitative Disclosures</u>	Amount in ₹ million
2.1 Capital requirements for credit risk	• 39700.3
• Portfolio subjected to standardized approach (@9%CRAR)	• 39700.3
• Portfolios subjected to the IRB approaches	• Nil

• Securitization exposures	• Nil		
2.2 Capital requirement for market risk (under Standardized duration approach)	• 2665.4		
• Interest rate risk	• 2328.3		
• Foreign exchange risk (including gold)	• 19.8		
• Equity risk	• 317.3

Risk Exposure and Assessment

Objectives and Policies

Organisational Structure---- Risk Management

Financial business entails bank to identify, measure, control, monitor and report risks in an effective manner. The key components of the risk management at the Bank rely on risk governance architecture, comprehensive processes and internal control mechanism based on approved policies and guidelines. The risk management system is overseen by Board of Directors, with Integrated Risk Management Committee (IRMC), a board level sub-committee entrusted with the overall responsibility of ensuring that adequate structures, policies and procedures are in place for effective monitoring and control. IRMC is supported by three separate Executive level Committees viz, Credit Risk Management Committee (CRMC), Asset-Liability Management Committee (ALCO)/ Market Risk Management Committee and Operational Risk Management Committee (ORMC) to ensure effective management of credit, market and operational risks respectively. The committees are assisted by risk management support groups for credit, operational, market and liquidity risks.

Table DF – 3: Credit Risk

General disclosures --- Credit Risk

Credit Risk is the possibility of loss that a bank may be subjected to, on account of changes or deterioration in the credit profile / credit quality of borrowers and counterparties. The Bank is exposed to credit risk through lending and capital market activities. The Credit Risk Management Policy aims at ensuring sustained growth of healthy loan portfolio while identifying and managing credit risks, both at transaction and portfolio levels. This entails striking a balance between risk and return, thereby ensuring optimization of values for all stakeholders and at the same time striving towards maintaining / increasing the bank's market share.

The Bank manages its credit risk through following strategies:

- a) Well defined credit risk management structure to identify measure, monitor and control / mitigate credit risk from loan origination to disbursement and post disbursement monitoring has been laid out.
- b) Credit Risk Management Policy lays down the roles and responsibilities, risk appetite, key processes and reporting framework. Credit Risk Mitigation and Collateral Management Policy detailing various tools for credit risk mitigation are prudently followed.
- c) Board approved Investment Policy of the Bank addresses credit risks related to investment activities undertaken by the Bank, prescribing prudential limits, methods of risk measurement and hedges required in mitigation of risks arising in investment portfolio.
- d) Corporate credit is managed through rating of borrowers and thorough risk vetting of individual exposures at origination and thorough periodic review after sanctioning. Retail credit to individuals and small business is managed through definition of product criteria, appropriate credit filters and subsequent portfolio monitoring.
- e) Industry wise segment ceilings on aggregate lending by the Bank.
- f) Individual borrower wise ceilings on lending as well as borrower group wise lending ceilings linked to the Bank's capital funds.
- g) The Bank has rating tools specific to market segments such as large corporate, SME, financial companies, project finance etc to objectively assess underlying risks associated with such exposures. The credit rating models use a combination of quantitative and qualitative inputs to arrive at a 'point-in-time' view of diverse risk factors of counterparty and also for taking credit decisions in a consistent manner.
- h) Allowing credit exposures as per the credit rating of borrowers upto defined thresholds of risk levels. The approach also includes diversification of credit portfolio rating

category wise but within the acceptable risk parameters.

- i) The Bank's entire current business is within India and hence there is no geographic ceiling on lending in India or outside India. Further, there is also no ceiling on lending within a State in India.
- j) A mechanism of clear and well defined delegation of authority operates within the Bank in regard to decision making, which links risk and exposure amount to level of approval.
- k) Regular review of all credit sanctioning powers delegated to various sanctioning levels so as to continuously strengthen the credit processes, and monitoring oversight are undertaken.
- l) Approval processes with respect to credit proposals are preceded by study of risks and preliminary due diligence particularly while sourcing fresh credit accounts.
- m) Credit audit system and loan review mechanism function independently of the credit processing / credit approval system and ensure effective loan monitoring, management / mitigation of credit and operational risks in the loan portfolio.

1. Qualitative Disclosures: The general qualitative disclosure requirement with respect to credit risk including:

1.1.1 Definition of NPA and impaired account

An asset including a leased asset becomes non-performing when it ceases to generate income for the bank. A non performing asset (NPA) is a loan or an advance where:

- a. Interest and/or installment of principal remain overdue for a period of more than 90 days in respect of a term loan
- b. The account remains 'out of order' as indicated in paragraph 1.1.2 below, in respect of an Overdraft / Cash Credit (OD/CC)
- c. The bill remains overdue for a period of more than 90 days in case of bills purchased and discounted
- d. The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops
- e. The installment of principal or interest thereon remains overdue for one crop season for long duration crops.
- f. In respect of securities, where interest/principal is in arrears for a period of more than 90 days.

An account is also classified as NPA if the interest due and charged during any quarter is not serviced fully within 90 days from the end of the quarter.

1.1.2 ‘Out of Order’ status: An account is treated as ‘Out of Order’ if the outstanding balance remains continuously in excess of the sanctioned limit / drawing power. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit / drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not sufficient to cover the interest debited during the same period, these accounts are treated as “out of order”.

1.1.3 Overdue: Any amount due to the bank under any credit facility is ‘overdue’ if it is not paid on the due date fixed by the bank.

1.2 Discussion of the bank’s credit risk management policy.

The credit risk management policy of the bank aims at ensuring sustained growth of healthy loan portfolio while evolving a well- defined system to identify measure, monitor and control various risks attached to credit portfolio of the Bank. This entails reducing exposures in high risk areas, concentrating more on the promising industries / sectors / segments, striking balance between risk and return on assets and ensuring optimization of stakeholders value. The policy also seeks to achieve prudent credit growth –both qualitative and quantitative- while adhering to the prudential norms with balanced sectoral deployment of credit to control credit concentration across Industries, sectors, segments and at the same time increasing the market share. The policy also aims at ensuring consistency and standardization of credit practices. There is a defined credit appraisal & credit approval authority, reporting cum monitoring / follow-up system and loan review mechanism/ credit audit system in place at the Bank.

2. Quantitative Disclosures		Amount in ₹ million
2.1 Total gross credit risk exposures – Fund based and Non-fund based separately, broken down by major types of credit exposures.	a) On Balance Sheet---	724706.5
	b) Off Balance sheet---	68184.9
	Total -----	792891.4
2.2 Geographic distribution of exposures:		
• Overseas	• -----	
• Domestic	• 792891.4
